

Integrated Logistics Support

→ Your challenges

- You need to be prepared for and control risks linked to the potential failure of production-critical processes,
- You want to solve this problem and design processes with low maintenance requirements,
- You need to assess the impact of product lifecycle changes,
- You want to know all the factors that influence operating costs, make the right decisions to cut them, where possible and without any hidden risks, and without giving up on major functionalities,
- You notice how your maintenance costs eat into your profit margins,
- You need to increase your competitiveness whilst lowering cost.

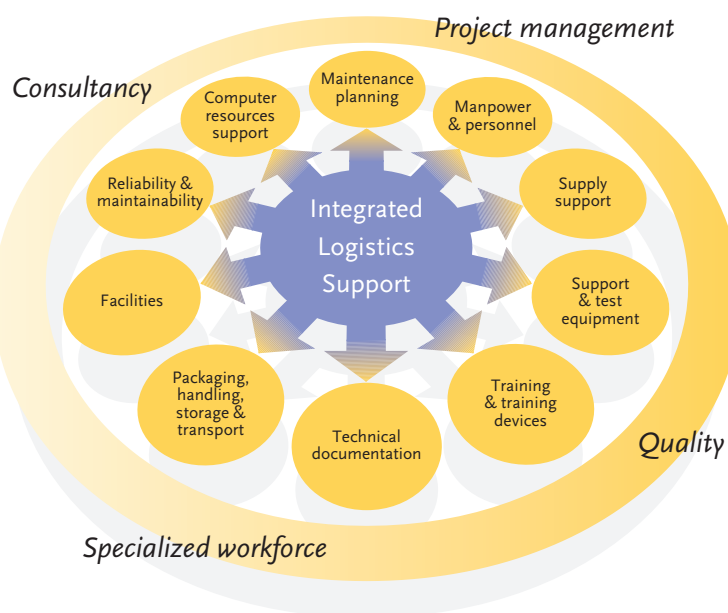

→ We can help

- Analysis and design:
 - we help you design your systems, or
 - we point out fields in your existing systems where improvements can make a noticeable difference,
- Maintenance engineering:
 - we come up with maintenance plans and policies while looking at operational availability and overall costing,
- Logistics and operational support:
 - we offer ways to increase the availability of your (existing) system while lowering the maintenance costs. The key word here is *reliability*,
- Our qualified staff (engineers, technical writers, etc.) have a wealth of expertise and proven field experience (in sectors such as aerospace, rail, naval and defence),
- We focus on quality (ISO 9001:2000, EN 9100, ISO 27001).

Integrated Logistics Support

Principal elements of Integrated Logistics Support

→ Your benefits

- Our offer is an all-in solution: we consult, study, assist, guide and support you,
- As a one-stop shop, we enable you to reduce handling time and cost. In addition, the monitoring of interfaces is made easier,
- Since we are able to adapt to a variety of complex environments, yours is bound to be familiar to us,
- Our support approach is very flexible: on site, fixed fee, results driven, or time and means. You are in control of where maintenance is done, how costing is done, etc.,
- Our worldwide presence (near- and offshore) allows for round-the-clock production,
- We develop business cases demonstrating cost-efficiency, in order for you to lower both your TCO and operating cost.
